IQAX Proforma Report

Frequent sailing schedule changes, tight vessel capacity, port congestion, fluctuating rates and unpredictable schedule delays present a huge challenge to NVOCCs in their daily operations. On top of that, ocean carriers' increased service adjustments to meet changing demand patterns during the pandemic has added a layer of difficulty for making informed decisions.

Obtaining comprehensive and updated carriers' proforma schedules provides earlier insights to upcoming schedules. The ability to plan with confidence, to avoid last minute scrambling for space, is crucial for profitable business operations with an excellent customer experience.

Equip Your Team with a Complete Carrier Service and Vessel Report

The IQAX Big Schedules Proforma Report provides 27 ocean carriers' comprehensive service loop and vessel deployment plans for nearly 3,000 services for NVOCCs to plan house-level service offerings and secure vessel space earlier with their carriers.

Rather than compile proforma schedules in multiple formats from carriers directly, IQAX's weekly report allows you to save time obtaining, consolidating and maintaining the reports. In addition, IQAX detects vessel schedule changes to pinpoint possible impacts to proforma schedules and investigates the carriers' proforma schedules to ensure that reports are up-to-date.

Jumpstart Your Service Planning with Earlier Schedule Data

Improve planning decisions with extensive service details

Gain a competitive advantage by obtaining carrier service details, including port calls, transit times, and arrival and departure days, before they are published so that you can plan, secure space, and price services earlier.

Enhance agility with extended visibility to vessel assignments

Further improve your service offering planning and pricing considerations by knowing the number of allocated vessels, TEU capacity, and reefer plug capacity on each service loop

Optimize your operations with higher productivity

Eliminate manual effort and reduce data management resources with a weekly comprehensive proforma schedules report
