

IQAX Carrier Performance Analytics

Every shipper prefers a reliable ocean carrier. However, with limited information, shippers can only take a trial-and-error approach to find the best performing carriers.

IQAX Carrier Performance Analytics offers an interactive dashboard to measure and analyze carriers' performance as well as market benchmarking. By setting up port-pair combinations, you can compare the performance across carriers based on your business needs.

IQAX Carrier Performance Analytics provides carrier performance information, including:

21

leading ocean carriers

300+

container ports

50,000

vessel schedules

5,900+

port pairs

1,700+

services
